

NAME

getuid – get user identification

SYNOPSIS

(getuid = 24.)

sys getuid

getuid()

DESCRIPTION

Getuid returns the real user ID of the current process. The real user ID identifies the person who is logged in, in contradistinction to the effective user ID, which determines his access permission at the moment. It is thus useful to programs which operate using the “set user ID” mode, to find out who invoked them.

SEE ALSO

setuid(II)
