

**NAME**

primes – print all primes larger than somewhat

**SYNOPSIS**

**primes**

**DESCRIPTION**

When *primes* is invoked, it waits for a number to be typed in. If you type in a positive number less than  $2^{56}$  (about  $7.2 \times 10^{16}$ ) it will print all primes greater than or equal to this number.

**DIAGNOSTICS**

'Ouch.' for input out of range or for garbage input.

**BUGS**
